Adelaide, SA, Australia (Subclass 485 - full work rights)

PROFESSIONAL SUMMARY

Data and software professional with a Master of Data Science from the University of Adelaide and 2.5+ years of enterprise experience across backend engineering, data analytics, and ETL development. Built production Java services at LTIMindtree, designed end-to-end Python data pipelines and ML models, and delivered technical findings to non-technical stakeholders across complex projects. Equally at home writing clean, tested application code and building analytical workflows from raw data to insight. Portfolio: ujjwalb.me.

CORE COMPETENCIES

Python & SQL

Java & REST APIs

ETL Pipeline Development

Machine Learning & NLP

Data Visualisation (Power BI)

Software Testing & QA

Agile Delivery

Stakeholder Communication

WORK EXPERIENCE

Woolworths Supermarkets

Apr 2024 - Present

Team Member / Assistant Department Manager -- Adelaide, SA

- Promoted to Assistant Department Manager within 7 months, overseeing team operations, inventory management, and performance standards.
- Applied data-driven thinking to stock management and operational efficiency improvements.
- Collaborated with cross-functional teams to meet store KPIs and service targets.

LTIMindtree

Jul 2021 - Dec 2022

Software Engineer (Consultant) -- Pune, India

- Built and enhanced enterprise backend services using Java and SQL, delivering maintainable, well-tested components with strong attention to correctness and stability.
- Developed and supported REST API integrations and data-processing workflows, strengthening reliability via validation checks, regression testing, and safe change practices.
- Conducted incident triage and root cause analysis using SQL investigation and log-based troubleshooting across UAT and production environments.
- Partnered with business analysts and stakeholders to translate requirements into implementable tasks, acceptance criteria, and technical documentation.
- Led a 5-member team through task planning, code reviews, and delivery follow-ups across Agile and Waterfall workflows; received **Best Performer** recognition.
- Created runbooks and standardised investigation procedures that reduced repeat incidents and improved handover quality.

LTIMindtree

Jun 2020 - Jul 2021

Graduate Engineering Trainee -- Pune, India

- Completed structured graduate program covering SDLC, database management, testing methodologies, and technical documentation.
- Built an Online Examination Portal (Java, MySQL, Tomcat) with role-based access, input validation, and automated reporting outputs.
- Tested APIs using Postman and unit tests; documented data flows, API contracts, and release notes for production handover.

PROJECTS

IPL Cricket Analytics 2025

End-to-end analysis of 260,920+ ball-by-ball IPL records (2008-2024). Built ETL pipelines with automated null detection, schema validation, and duplicate checks. Engineered career batting and bowling KPIs with configurable minimum-sample thresholds. Designed a composite Player Impact Score (PIS) via min-max normalisation (0-100 scale). Produced 11 publication-quality charts covering player rankings, team win rates, and season trends.

Python (pandas, Matplotlib, Seaborn) | ETL | Data Engineering | Analytics

FDA Adverse Event Data Insights 2024

ETL and NLP analysis on large-scale FDA adverse event datasets. Built Python pipelines to clean, transform, and validate narrative datasets. Developed classification and topic modelling workflows with evaluation and error analysis. Delivered stakeholder-ready insight summaries translating technical findings into clear recommendations.

Python | NLP | ETL | Topic Modelling | Data Analysis

Fake News Detection 2024

End-to-end NLP text classification pipeline. Built a reproducible evaluation harness to compare models consistently across experiments. Refined preprocessing for improved model robustness; documented approach, limitations, and recommendations.

Python | scikit-learn | NLTK | NLP | Classification

Online Examination Portal Java | Full-Stack

Full-stack web application with role-based access control, input validation, and automated report generation. Implemented using Java, MySQL, and Apache Tomcat. Documented API contracts, data flows, and release notes for production handover.

Java | MySQL | Tomcat | OOP | REST | Documentation

EDUCATION

Master of Data Science — University of Adelaide	Jan 2023 - Dec 2024
CGPA: 5.64 / 7.00 Adelaide Graduate Award recipient Coursework: Big Data Analysis, Deep Learning, Advanced NLP, Decision Science	
B.Tech, Computer Science & Engineering — University of Petroleum and Energy Studies	2016 - 2020
CGPA: 8.08 / 10.00 Coursework: Data Structures, DBMS, Operating Systems, OOP, Computer Networks	

CERTIFICATIONS & MEMBERSHIPS

Oracle Certified Associate, Java SE 8 Programmer — Oracle	Active
Google Data Analytics Professional Certificate — Google / Coursera	Active
Introduction to Generative AI — Google Cloud Skills Boost	May 2026
SQL Essential Training — LinkedIn Learning	Apr 2026
Member — Australian Computer Society (ACS)	Active

SKILLS

- Languages:** Python, SQL, Java, R
- Data & Analytics:** pandas, scikit-learn, NLTK, Power BI, Tableau, Excel
- Data Engineering:** ETL pipelines, data cleansing, schema validation, reconciliation
- ML & NLP:** Classification, topic modelling, deep learning, NLP pipelines
- Software Engineering:** Spring Boot, REST APIs, OOP, JUnit, Postman, clean code
- Tools & Practices:** Git, Linux, CI/CD exposure, Agile, Waterfall, technical documentation
- Languages spoken:** English (professional), Hindi (professional)
